

Course Topics

Department: Computing

Program: Graphic Design and Multimedia

First Year Courses

Course Code UST01 Course Name Quran Recitation & Tajweed Skills	Credit Hours: 1
يعد هذا المقرر من المقررات المهمة؛ كونه متعلق بكلام الله تعالى ثم إنه من متطلبات الجامعة، وهو مقرر نظري وتطبيقي يقوم الطالب فيه بتلاوة وحفظ نصف جزء عم من سورة (الطارق-الناس)، ودراسة الآداب التي ينبغي أن يتحلى بها قارئ القرآن، وفهم وتطبيق هذه الأحكام عند قراءة القرآن الكريم، وتستخدم طريقتي الحوار والمناقشة في التدريس، ويتم تقييم الطالب من خلال تلاوته للقرآن أثناء اللقاءات التعليمية، والقيام بالتكليفات المصاحبة - الصفية واللا صفية - مع الامتحانين النصفي والنهائي.	
Course Code UST02 Course Name English Language (1)	Credit Hours:4
The current course provides students with the language basics of everyday English to help them communicate in different real-life situations. The course focuses more on real life conversations and the basic grammars that will help each one in his/her major. Moreover, the course provides students with plenty of writing and speaking practices. The updates of the book allow students to be posted with the latest language uses and functions that are easy and useable in real life situations.	
Course Code UST03 Course Name Arabic Language	Credit Hours:3
يهتم المقرر بتمية المهارات اللغوية الأساسية للطالب كونه من متطلبات الجامعة ويتناول جملة من النشاطات الاتصالية والدروس اللغوية والإملائية والتركيبية ويحتوي على معارف ونصوص وتدريب لغوية، ويتألف من كتابين: الأول يركز على مهارتي الاستماع والتحدث، والثاني يركز على مهارتي القراءة والكتابة، مع احتواء كل من الكتابين على أساسيات التركيب النحوي وبعض القواعد الإملائية ويعتمد المقرر أسلوب التدريبات والتطبيقات العملية لكل طالب، بالإضافة إلى النصوص التطبيقية في CD المرفق بالكتاب مع الامتحان النصفي والنهائي.	
Course Code UST09 Course Name Computer Skills	Credit Hours:2
This course provides a student by basic skills for using computer at studying environment, library, and at home. It presents the knowledge of basic computer and information technology concepts. The course provides the knowledge needed to operate and utilize the operating system and office software package, and to use the computer for Internet access and electronic communication.	
Course Code CIT01 Course Name Principles of Mathematics	Credit Hours:3

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

This course is designed to provide you with a solid foundation in the fundamentals of mathematics. The topics included in Basics of Mathematics are: Fundamentals of Algebra (Powers and Roots) Arithmetic (the basic operations of addition, subtraction, multiplication, and division), Types of Functions, Algebra (the use of symbols and letters to represent numbers and solve equations), Trigonometry (the study of trigonometric ratios and relationships between side lengths and angles of triangles), Calculus (the study of rates of change and accumulation), Limits and Continuous.	
Course Code CIT04 Course Name Computer Fundamentals	Credit Hours:3
This course will introduce: 1) fundamental electronic data processing concepts and associated terminologies. 2) the development of computers and computer application. 3) the impact of computer on society. Furthermore, peripherals of an actual computing system CPU configuration. Device interfaces. Binary number systems, and professional ethical issues in computing will be discussed.	
Course Code CIT05 Course Name Principles of Programming	Credit Hours: 3
This course will cover the abstract and structure of programming, problem-solving techniques and tools, flowcharts and algorithms. Abstract data types and their list, variables declarations and memory locations. Arithmetic operators, operator's precedence, equality and relational operators, cohesion and coupling. Abstract programming structure types: sequences, selection (decision making), iteration, multiple iteration, and errors types and Program structure correctness and verification, one and multi-Dimensions arrays (basics using and operations).	
Course Code UST05 Course Name Islamic Culture	Credit Hours:2
يعد مقرر الثقافة الإسلامية من أهم المقررات الدراسية وذلك للدور الذي يساهم فيه هذا المقرر في تكوين الشخصية المسلمة القادرة على قراءة ماضيها وفهم واقعها والإسهام الإيجابي في بناء المستقبل بناءً يوافق شرع الله ويلبي احتياجات العصر من غير إفراط ولا تفريط (بوسطية). ويتم أخذ هذا المقرر بطريقة الحوار والمناقشة، كما يكلف فيه الطلبة بالبحوث التي تخدم أهداف المقرر. ويتم تقييم الطلبة عن طريق المشاركة الصفية واللاصفية والأعمال التي يكلف بها الطلبة والاختبارات النصفية والنهائية.	
Course Code UST06 Course Name English Language (2)	Credit Hours: 4
The current course provides students with the language basics of everyday English to help them communicate in different real-life situations. The course focuses more on real life conversations and the basic grammars that will help each one in his major. Moreover, the course provides students with plenty of writing and speaking practices. The updates of the book allow students to be posted with the latest language uses and functions that are easy and useable in real life situations.	
Course Code UST07 Course Name Communication Skills	Credit Hours: 1
يهدف مهارات الاتصال إلى إلمام الطالب بالنظريات والمفاهيم الأساسية في مجال الاتصال الإنساني وتنمية المهارات الأساسية في مجال التواصل الجيد مع الذات ومع الآخرين، وتعزيز ممارستها في حياته اليومية والعملية باستخدام أساليب جديّة تعتمد على التدريب والتقييم المتنوع والفعال، بما يساهم في إنجاح حياته الخاصة والعملية على حد سواء .	
Course Code CIT06 Course Name Computer Programming	Credit Hours:3

This course will cover the rest of structure programming concepts and advance topics such as arrays, functions, pointers, strings, structures, files, and introduction to object-oriented programming.

The prerequisite of this course is Principles of Programming.

Course Code GDM112 Course Name Art History

Credit Hours: 2

This course is designed to give students the opportunity to discover, appreciate, and acquire knowledge of art history through the ages, from the prehistoric era to contemporary times. The students will learn to examine and critically analyze major forms of artistic expression from diverse cultures and understand their contributions to the arts. A variety of art media and styles will be studied as the students look at architecture, manuscripts, painting, drawing, printmaking and sculpture, as a reflection of a given civilization and time period.

Course Code GDM111 Course Name Drawing

Credit Hours: 3

An introductory drawing course, this covers the basic elements of drawing—line, shape, value, texture, space and perspective using a variety of subjects still - life, models and the natural world. While we will focus on learning to draw what you see and on composition, you will be encouraged to experiment with a variety of materials and ways of working as a means of finding your own style and form of expression and Students will continue to work on gesture, proportion, value, line, and composition with the addition of color, space, abstraction and time. While graphite, charcoal, and ink will play a recurring role, they will bring digital, photography and non-traditional media into the mix. Students will draw from a wide variety of subject matter, including still-life displays, the human figure, nature, and the collections of some museums. As the semester progresses students will shift from strictly observational studies to a more conceptual approach to drawing, using the work of contemporary artists as a guide.

Course Code UST08 Course Name Critical Thinking

Credit Hours: 1

التفكير الناقد مادة هدفها الأساسي بناء وتنمية مهارة الطلاب الذهنية في مجال التعامل مع الآراء والأفكار المقروءة أو المسموعة أو المرئية لإبداء الرأي المؤيد أو المعارض استناداً إلى المهارات الذهنية المنظمة، والمهارات المعرفية والخبرات والتجارب. يتضمن العديد من الموضوعات الرئيسية كمفهوم التفكير الناقد وفائدته العملية والتعليمية و في الفصل الدراسي ، ومعايير ، ومعوقاته ومقوماته الأساسية والمساعدة ، وكيفية بناء حجج مقنعة بالاستناد إلى الاستدلال الناقد ، مع بيان صور المغالطات والخدع البلاغية ، ثم توجت المادة بخاتمة تضمنت تطبيقات مهارات التفكير على بعض الظواهر والمجالات الحيوية في الحياة ، والطريقة المثلى لتدريسها تكاد تنحصر في الجانب النظري من خلال المحاضرات والمداخلات والمناقشات المستفيضة ، مع تعزيز ذلك بقدر كبير من الأساليب التدريسية ، كلعب بعض الأدوار ، وعرض مقاطع فيديو بالصوت والصورة ، وإجراء بعض المناظرات ، خصص لتدريسها والتدريب على بعض مفاهيمها 17 ساعة في الفصل الدراسي الواحد، وتدرس بنظام الساعة (زمن المحاضرة ساعة واحدة).

Second Year Courses

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

Course Code GDM123 Course Name Digital Imaging	Credit Hours: 3
This course focuses on the continued use of digital imagery in art and design, by furthering a student's skill in the use of raster image (Adobe Photoshop), and scanning software. The course goes beyond the basic techniques covered in Introduction to Computer Graphics, exploring more advanced electronic image creation and manipulation techniques, and addresses some of the technical issues facing a computer artist and designer.	
Course Code GDM212 Course Name Photography	Credit Hours: 2
This beginner digital photography course is meant to help you master your digital camera. Learn the basic functions of your camera so you can begin to shoot in manual mode, capturing higher-quality images of the people and places around you. Professional photographers will show you how to see the world like a photographer, whether you're just starting out or you've been taking photos for years. Throughout the course, you'll complete a series of photo projects that will help you practice the skills you are learning. Your teacher will work with you, reviewing your photos and helping you improve as you complete the program. By the time you finish, you will have the skills and know-how to take professional-quality photographs.	
Course Code GDM214 Course Name Computer Illustration	Credit Hours: 3
This course deals with training students on computer graphics software, different techniques and commands, and the extent to which they can be used in various design processes, with training on two- and three-dimensional designs, studying the control of the elements that make them up, in addition to adding appropriate texts and effects, and the ability to create an artwork experience (logos, icons, texts, etc.) using contemporary digital tools (Adobe Illustrator program)	
Course Code GDM122 Course Name Introduction to Graphic& Multimedia	Credit Hours: 2
This course is designed to give students the opportunity to discover, appreciate, and acquire knowledge of art history through the ages, from the prehistoric era to contemporary times. The students will learn to examine and critically analyze major forms of artistic expression from diverse cultures and understand their contributions to the arts. A variety of art media and styles will be studied as the students look at architecture, manuscripts, painting, drawing, printmaking and sculpture, as a reflection of a given civilization and time period The basic principles and practices of interactive computer graphics and multimedia systems are covered in this introductory course. The design and implementation of state-of-	

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

the-art computer graphic rendering and visual multimedia systems are the main part of the course. The sub-topics of the course deal with specific input/output hardware devices and their technology, software and hardware standards, programming methods for implementing 3- dimensional graphical applications and interactive multimedia applications, and a study and evaluation of the effectiveness of graphic/multimedia communications. A large component of the class is the building of a large-scale application

Course Code GDM211 Course Name Principles of Graphic Design	Credit Hours: 3
The Principles of Graphic Design course is designed for anyone wishing to understand the theory behind design and what makes a design a great design. This course prepares candidates for a strong understanding of visual communication within the graphic design field. Additionally, students will walk away with a formidable understanding of business aspects in the field of graphic design and the ability to create a professional graphic design portfolio to showcase their work. Having a solid understanding of visual design is imperative for every marketer, designer, and business owner to have to propel their business into the age of digital. Having this skill will enable you to have an edge in business over your competitors and keep you on the cutting edge. – Well-designed graphical design elements received 37% more engagement than posts that do not. Completing the principles of graphic design course will give you underpinning knowledge as a designer and a business owner. The Digital School of Marketing's The Principles of Graphic Design Course will teach you the principles that underpin graphic design – as well as what goes into creating a visually engaging and well-designed image – so that you can create these for your business	
Course Code GDM213 Course Name Perspective Drawing & Anatomy	Credit Hours: 3
This course students will build upon their drawing skills in object and spatial description. Special attention will be given to surface anatomy of the human figure with an overview of historical techniques for inventing figures and using them to dramatize stories. The course will also deal with systems of perspective used to create the spatial drama central to visual storytelling. Exercises will be structured around narrative problems using the human figure, animals and inanimate objects in fully imagined environments	
Course Code BCO05 Course Name Introduction to Web Design	Credit Hours: 3
In this course, you will learn to create and maintain Web pages using HTML and CSS. This course is taught in our PC computer lab, but you can do the coursework on other computer platoons. It is assumed that the student is proficient with the operating system on their r computers, including file management and connecting to the Internet. It is also assuming that you are proficient with using of Web browsers. In this course you will learn to edit HTML and CSS files directly using html or text editors. You should NOT be using a Web authoring program in a WYSIWYG (What You See Is What You Get) environment, such as Adobe Dreamweaver. You may, however, use the Code View of Dreamweaver or other such programs. Learning to create Web pages can be frustrating at times because simple, easily-missed typos can cause page errors. But with careful typing, use of page validation, and practice, it is not too difficult to become proficient. The Inure you practice with HTML and CSS	

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

coding, the better you will become, so students are encouraged to experiment. Before this approach should be studied material programming and problem solving

Course Code GDM215 Course Name Digital A audio	Credit Hours: 2
---	------------------------

Building on skills developed in the EPD core curriculum, students design and produce audio content for the kinds of real-world production projects they might expect in their career. Working in the EPD studios, students will produce content that ranges from spoken word to sound and music mixed in surround. Students are introduced to techniques and applications that are essential for pursuit of a variety of professional opportunities in the areas of sound design and audio production for film, video games, broadcast media, as well as all types of music production

Course Code GDM225 Course Name Visual Identity	Credit Hours: 3
---	------------------------

The aim of course to give an introduction to the concepts of visual identity, branding and methods of market analysis and to study visual product identity from both, the brand and the product design perspective. A project work with focus on product differentiation and positioning, customer categorization, brand development and design strategy will provide the opportunity to apply theories and methods in a new product design under the roof of a specific product identity.

Course Code GDM221 Course Name Design of Packaging	Credit Hours: 3
---	------------------------

Packaging design is a design project where the students are introduced to methods and visual principles for graphic designs on three-dimensional objects. The students shall develop design for packaging that effectively communicates functions and qualities for defined target groups. The concept shall communicate effectively in different (3D) formats. The module builds on the student's competence and skills in branding from the module Strategic design.

Course Code GDM223 Course Name Information Design	Credit Hours: 2
--	------------------------

information Design is project-focused. Students learn about design and software primarily by *creating*: brochures, flyers, newsletters, manuals, and information graphics, plus a final project of their own invention. Students create these user-friendly publications in a series of focused modules, so that the semester plays out as a set of mini-courses, each with short readings and exercises stressing user-centered design. Along the way we practice audience-awareness, collaboration, peer critique, editing, writing, and visual design. Students spend the final third of the course developing an independent project, which they formally present to the class for feedback before final submission. Students interested in previewing the mindset of the course should peruse the Info Design blog, the best source for current information in the field.

Course Code GDM315 Course Name Multimedia Applications	Credit Hours: 3
---	------------------------

Theory: The course aims to provide students with a background in multimedia concepts and their applications using text, graphics, animation, audio, and video, and the ability to combine them to process and present information in a more organized and understandable way. The main objective of this course is to help students create a digital portfolio and other independent and interactive projects using the basic elements of multimedia and design concepts. It also aims to focus on

creating interactive projectbased learning experiences to understand design issues. Design, development, and presentation of multimedia using multiple means. Practical: Creating interactive content using multimedia (audio, video, text, images), such as an educational application for business, engineering, medicine, etc.

Third Year Courses

Course Code GDM227 Course Name Storyboarding	Credit Hours: 3
Apractical introductory course that emphasizes the fundamentals of digital storyboarding to include storyboarding basics, proper composition, staging for clarity, pitching and critique. This is a required course for all Animation undergraduates in preparation for their Senior capstone film	
Course Code GDM222 Course Name Publishing Design	Credit Hours: 3
This course explores contemporary approaches to professional, commercial and experimental publication design Students will develop the skills and knowledge required to prepare files for print applications through the design and production of a publication. Student projects may involve work integrated or research integrated learning opportunities; projects that involve external stakeholders; group/collaborative projects; speculative or more theoretically oriented projects; professionally oriented projects; projects based on competition or award briefs	

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

Course Code BEC04 Research Methodology - (مناهج البحث العلمي)	Credit Hours: 2
يعد هذا المقرر من اهم المقررات الدراسية كونه يمكن الطالب الجاكعي من المهارات التي تساعده على انجاز بحث التخرج وهو يعمل على اكسابه مجموعه من المعلومات والمعارف حول العلم والمعرفة والبحث العلمي ومناهجه ويتمى الاتجاهات الايجابية لدى المتعلم تجاه البحث العلمي ويتحقق ذلك من خلال مجموعه من الانشطة الفاعله (طرائق واساليب تدريسية ووسائل) كطريقة الحوار والمناقشة والتعلم الذاتي والبحث والتطبيقات مع استخدام Powerpoint عن العرض وتقييم الطالب من خلال مشاركته الصفية والتكليفات المصاحبه الصفية واللاصفية والاختبار النفي ولنهائي	
Course Code GDM226 Course Name Advertising Concepts and Copywriting	Credit Hours: 2
<i>Advertising Copy and Layout</i> is a skills course focusing on the creative aspects of advertising. In this course, you will be part of a group who will select a local business or non-profit agency for whom you can develop pan advertising plan and advertising executions. Through this process you will learn how to research for information on both product and consumer and apply this information in developing campaign strategy. You will learn to write advertising messages for print and broadcast, design print ad layouts, and plan and prepare broadcast story boards. Internet advertising will also be studied	
Course Code GDM312 Course Name Typography	Credit Hours: 3
This course focuses on the further exploration of typographic studies. Students will apply previously learned design and typography theory to conceptualize solutions to more complex visual communication problems through the use of professional level graphic design page layout software (InDesign). This intense focus in graphic design will further a student's production skills and knowledge, extend the student's capacity for conceptual thinking and visual problem solving, and allow for the further exploration of the creative and practical aspects of typography and the special relationship between type and image.	
Course Code GDM313 Course Name Project Management and Planning	Credit Hours: 2
The course aims to introduce students to the fundamentals of project management and planning in the field of graphic design and multimedia. It covers the stages of a project from concept to execution and delivery, with a focus on time management, budgeting, resource allocation, teamwork, and quality control. The course also familiarizes students with digital tools and modern technologies that support workflow organization and effective communication with clients and team members. Students will have the opportunity to apply the acquired skills to real or simulated professional projects, enhancing their readiness for the job market and equipping them with the ability to manage successful design projects.	
Course Code GDM316 Course Name 3D Modeling	Credit Hours: 3

Theoretical: Providing students with the basic techniques for designing 3D objects, and a solid understanding of how to model a scene with its contents of interactive elements and visual cameras, in addition to how to map 3D scene information. Developing students' practical skills using a 3D design program that helps them transform their imagination from hand-drawn sketches into images. Expanding students' understanding of 3D design and modeling principles. Helping students develop visual prediction skills, technical anatomy concepts, building and sculpting elements to be animated, principles of animating 3D objects, and the foundations, axes, and laws of animation. Practical: Creating structural applications for animated 3D objects according to specific animation themes, implemented on the program. Blender 3D Max Cinema 4D.	
Course Code GDM311 Course Name Digital Video	Credit Hours: 2
Students learn the fundamental skills of digital video production from preliminary steps, such as script creation, through the final film edit. Coursework provides an overview of digital camera operation as well as basic techniques in lighting, sound and editing. Basic theory is taught through demonstration, hands-on learning and class discussion. Students also learn how to transfer VHS and Hi8 analog films to digital formats	
Course Code GDM314 Course Name 2D Animation	Credit Hours: 3
Theoretical: This course introduces students to the basic principles of animation, its beginnings, the art of animation and its foundations, the development of twodimensional cartoon characters, and the method of performing them manually or through computer programs. It develops the student's skills in graphic design, movement analysis, manual skills, and digital animation. It also studies various techniques for producing animation using Adobe After Effects programs. It also helps the student acquire the tasks of an artist and animator using modern technologies in the field of animation. Practical application: A short two-dimensional animation video project not exceeding 30 seconds	
Course Code GDM224 Course Name Creative Thinking	Credit Hours: 2
Theoretical: This course presents a study of the concept of thinking and its characteristics, the thinking style, and the thinking process. The stages of creative thinking, from defining the problem to arriving at a solution in a practical visual form. A practical project to apply the stages of creative thinking in designing an advertisement, part of a visual identity, packaging design, etc	
Course Code GDM322 Course Name 3D Rendering & Animation	Credit Hours: 3
Theoretical understanding of 3D graphics and motion, studying visual effects, lighting and background techniques, colours, movement and animation, creating and editing models and directing in short video clips and commercials, practical application of a 3D animated project	
Course Code GDM324 Course Name Web Design & Animation	Credit Hours: 3

. Theory: This course covers advanced techniques in web design, focusing on the functionality of interactive websites and the effective use of text, graphics, and animation. Students explore several aspects of design concepts, software proficiency, and web development fundamentals. Graphics, typography, charts, and images—to communicate an idea. While graphic designers can work on both print and digital projects, web design deals exclusively with websites. Web designers also have to consider things like file size, image resolution, and so on. Graphic design focuses on user interface (UI) design, while UX design focuses on animation, etc. Practical application of a user interface for a specific field (educational, entertainment, healthcare, etc.)

Fourth Year Courses

Course Code GDM321 Course Name Visual Effects	Credit Hours: 3
Theory: This course aims to introduce students to the theories, concepts, principles, and techniques of multimedia using Adobe After Effects. The course also explains techniques for working with graphics, images, sound, video production, animation, color palettes, 3D engineering, and adding various types of audio and visual effects in order to produce animated video clips. It provides students with skills in the pre-production, production, post-production, and interactive media stages. It develops students' skills in the areas of major visual effects, such as production planning, drawing, simulating effects, and 3D lighting, and employing them in creating intros, visual and audio commercials, and directing them for multimedia, with the aim of enhancing digital interactive communication skills by following the basic aesthetic and functional theories of motion composition. Practical application of an interactive, educational, guidance, health, etc. motion project. Prerequisite: Video, digital audio, 3D.	
Course Code CIT14 Course Name Field Training	Credit Hours: 3

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

This course offers instruction on using computer tools and their applications in a variety of industries. training in institutions in the public or private sectors, under the direction of department faculty. that The students' acquisition of information and experience occurs through field training, which is supervised by real-world situations. exercising in the training program's academic component. Students benefit from field experience, which also contributes to on-the-job training. There should be opportunities for non-learning during field training. present in classrooms

Course Code GDM413 Course Name Visual Communication Seminar	Credit Hours: 2
--	------------------------

. Theoretical: Understanding visual communication and its importance in graphic design aims to study how ideas are communicated through visual representations of information such as images, art, and signs from the board to the screen. Identifying the elements of visual communication, including visual intelligence, graphic design, and perception. It also includes practicing the use of visual elements to achieve design-related themes. Group discussions and analysis of events, processes, appearances, and actions in visual communication design. Exploring effective visual communication techniques. Practical development of a project or presentation on a specific topic in graphic design.

Course Code GDM411, GDM421 Course Name Graduation Project I, II	Credit Hours: 3
--	------------------------

Graduation Project Research Each student submits a graduation project proposal in the form of research in one of the design fields: graphic and multimedia. The proposals are discussed and approved. A set of contemporary artistic issues related to environmental and local problems that are still under research and new and innovative solutions may also be proposed. This is implemented through various media and advertising methods such as designing a company or institution's logo, letterhead, envelopes, business cards, CD covers, calendar design, folders and various promotional prints, posters, roll-ups, billboards, newspaper ads, packaging design, folded magazine ads, website design, application design (UI and UX design), 2D or 3D animated films, animated graphics, short promotional videos, etc. The research plan for the college and department is approved. The initial discussion of the graduation research will take place at the end of the first semester, provided that approximately 60% is completed and Applying the practical part of theoretical and practical research in Graduation Project 1 in cooperation with the relevant supervisor. The project is presented in its integrated artistic form in graphic design or multimedia.

Course Code GDM414 Course Name Portfolio Development	Credit Hours: 2
---	------------------------

Theoretical: Learn how to compile evidence or multiple previous and current works, study how to select, identify the basic components of a designer's portfolio from design to execution, and study the initial influences so that they are characterized by strength and appeal, as they not only showcase your skills but also set the tone for your professional identity by presenting a polished and cohesive collection of work. They also reflect your problem-solving abilities, reflect your personal brand and style as a designer, so that the viewer understands your creative vision. This course is an opportunity for design graduates to improve their portfolios by correcting existing work and adding new work for review. It provides practical support in preparing a portfolio and an opportunity for students to

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf

develop their creative abilities. It also provides practical support in writing a professional CV and cover letter, drawing, and giving presentations, as your portfolio is about showing who you are as a designer and what you can do practically. A design portfolio that includes student work is considered a booklet for the purpose of applying for a job or preparing a professional profile

Course Code GDM423 Course Name Special Topics

Credit Hours: 3

The theoretical part of the course includes the study of the nature of the selected topics and fields of graphic design. It covers various modern topics - interactive design, sustainability, digital marketing, etc. - of current interest in the field of multimedia design: digital. Among the selected topics are graphic design works, 3D digital design: reviewing modern trends in graphic design and media or multimedia presentations. These vary each year according to the contemporary trends of the program, which helps students deepen their understanding and develop their skills in specific areas of design: developing a design project that reflects one of the studied topics, giving presentations to share ideas and projects.

Head of Department
T. Nadhem Al-Hadad

Dean of Faculty
Dr. Nasr Alsakkaf
